

# San Sebastián

The Old Town, at your own pace

One selected walk: Constitución, San Vicente, San Telmo and Santa María del Coro. This keeps the site's historic route order. Enjoy the exteriors or choose just one interior; entering every building changes the programme. Admission and a measured duration are not included. Start in the square and finish at the basilica, without automatically adding the bay or a hill.

**1 Constitución > 2 San Vicente > 3 San Telmo > 4 Santa María**

## Schematic, not a street map

Points positioned using WGS84 coordinates. Original drawing without a basemap: streets, pavements, barriers and exact entrances are not shown. Numbers indicate the proposed order, not a walkable path. North is up; the scale is approximate and straight-line, never a walking distance.

## From paper to your phone

1. Find the stops by name and number.
2. Open the map using the QR or written link.
3. Select a stop for directions from your current position. Follow actual signs; lines on the schematic are not street instructions.

### Interactive map in English

## What to notice and what to choose

### 01 Constitution Square

The numbered balconies recall the square's former use as a bullring. Look at the numbering from public space and use the square to find your bearings in the Old Town. This starts the walk; it is not a reserved interior visit. [1]

43.323613, -1.984892 | [Walking directions online](#)

### 02 San Vicente Church

Its Gothic architecture contrasts with the Baroque finish of the walk. Look at the arches and facade. If entering, check the church's arrangements and respect worship; the exterior walk does not guarantee an interior visit. [2]

43.324544, -1.984111 | [Walking directions online](#)

### 03 San Telmo Museum

A former convent houses a museum of Basque society and culture. If choosing one interior, give it your cultural session and reduce other admissions. Check the programme and conditions with the museum before relying on a visit. [3]

43.324770, -1.985301 | [Walking directions online](#)

### 04 Santa María del Coro

The Baroque facade stands at the end of Calle Mayor. Pause to compare its composition with San Vicente. This is the selected finish; do not assume unrestricted admission, concerts or access to every space when passing. [4]

43.323991, -1.986693 | [Walking directions online](#)

## Two useful choices about what to leave out

More culture: choose San Telmo and keep the churches as exterior stops. More outdoors: skip interiors and finish here, or deliberately extend towards the harbour. Urgull involves a climb; following La Concha towards Miramar changes your endpoint. None of these extensions is drawn on this schematic.

## Accessibility and conditions

The complete walk has not been audited for accessibility. Consult the official San Telmo and Santa María access sheets if you need to avoid steps or gradients: they describe different conditions and limitations. Do not use this schematic to locate a ramp. Admission arrangements and worship may change.
